JERWIN NICO H. QUIJANO

Full-Stack Developer | Backend & AI-Assisted Development
09917604723 | jerwinquijano19@gmail.com

PROFESSIONAL SUMMARY

Full-stack developer experienced in building data-driven web applications using Python, Django REST Framework, FastAPI, React, and PostgreSQL. Contributed to municipal permitting and multi-state healthcare operations platforms involving role-based access, structured workflows, and secure data handling. Uses AI coding tools to accelerate implementation, debugging, refactoring, and documentation while reviewing generated code for correctness and maintainability. Currently pursuing a Bachelor of Science in Information Technology.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Backend:** FastAPI, Django, Django REST Framework, REST API development, JWT authentication
- **Frontend:** React 19, Vite, Tailwind CSS
- **Databases & Integrations:** PostgreSQL, Supabase, PayMongo API
- **Tools & Workflow:** Git, GitHub, AI coding assistants and agents, automated testing, technical documentation

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer

ST Business Consulting | Healthcare Compliance & Caregiver Operations Platform

- Contributed to a multi-state healthcare operations platform supporting operations across Florida, Indiana, and Georgia.
- Worked on workflows for caregiver onboarding, credential tracking, client intake, service agreements, care plans, authorizations, and scheduling.
- Contributed to backend architecture and maintainability through modularization of application components.
- Worked with state-scoped authorization and data-access boundaries to support tenant isolation.
- Contributed to data-integrity and compliance workflows, including audit logging, electronic signatures, and data-retention processes.
- Used AI-assisted development tools to support implementation, debugging, refactoring, and documentation, with human review of generated changes.

SELECTED PROJECTS

Livestock Transport & Biosecurity Management Platform

Sariaya Municipal Agriculture Office | Django REST Framework, PostgreSQL, React 19, Vite, Tailwind CSS, PayMongo API, JWT

- Developed a full-stack municipal platform to digitize livestock transport permits and support African Swine Fever (ASF) monitoring.
- Designed application workflows across permit submission, barangay endorsement, veterinary clearance, payment, and QR-code issuance.
- Implemented role-based portals and integrations supporting permit processing and verification.
- Built OCR-assisted document validation, QR-based checkpoint verification, and SMS notification workflows.
- Developed GIS-based maps and barangay zoning visualizations for livestock density, survey data, and quarantine boundaries.

EDUCATION

Dalubhasaan ng Lungsod ng Lucena

Bachelor of Science in Information Technology | 2023–Present
